BUSINESS LAW POSTER COMPETITION
SUMMER 2026

“Crisis to Compliance: A Bangladeshi Business Under Legal Fire”

The Challenge

Last time, your seniors built a business. This time, you must save one.

Every real business in Bangladesh eventually meets the law — sometimes as a shield, sometimes as an opponent. In this competition your group will invent an original Bangladeshi business, take it from formation to growth, and then throw it into a legal crisis it must survive.

Your poster must prove two things: how the five core business laws **build** a company, and how those same laws **rescue** it when things go wrong. You will not merely describe the law — you will apply it, defend it live before a judging panel, and prove you can out-think the very AI tools you use.

Objective

To develop students’ ability to integrate multiple business laws to diagnose and solve realistic commercial problems, apply them to authentic Bangladeshi contexts, and use AI tools critically, ethically, and with proper verification presented through a single, visually powerful poster and a live defense.

Group Formation

- Each group consists of 3–5 students.
- Every member must actively contribute to research, design, and the live presentation.
- Each group registers a unique business concept for instructor approval. No two groups may share the same business or crisis (first approved, first locked).

The Mission (Two Acts)

Your business must travel through a clear story arc. The poster and presentation must cover both acts.

Act 1 — The Rise

- Invent an original Bangladeshi business (product or service) and choose its legal structure sole proprietorship, partnership, or company and justify the choice.
- Show how it is formed and how it operates: the contracts it signs, the goods it buys or sells, and the cheques / promissory notes / bills of exchange it uses.

Act 2 — The Crisis

A legal problem strikes. Your team must resolve it using the correct laws, remedies, and legal reasoning. Pick one crisis (or design your own, subject to approval):

- A supplier delivers defective or wrong goods on a large order.
- A customer's cheque bounces, or a promissory note is dishonored.
- A key contract is breached and one side demands damages or specific performance.
- Two partners fall out over profit sharing, authority, or a partner's exit.
- A shareholder / director dispute, or a compliance failure, threatens the company.

Mandatory Legal Areas

All five laws below must be woven into your single business story — not listed separately, but shown working together across the two acts:

- 1. Contract Act 1872** — formation, terms, breach, and remedies.
- 2. Sale of Goods Act 1930** — conditions, warranties, transfer of ownership, defective goods.
- 3. Negotiable Instruments Act 1881** — cheques, promissory notes, bills of exchange, dishonor.
- 4. Companies Act 1994** — incorporation, shares, directors, corporate governance.
- 5. Partnership Act 1932** — formation, rights and duties of partners, dissolution.

Bonus Challenge Law (optional, up to +1 mark): weave in ONE modern law that fits your crisis and apply it correctly — e.g. Consumer Rights Protection Act 2009, Bangladesh Labour Act 2006, Arbitration Act 2001, or a relevant tax / VAT or digital-commerce rule. Extra realism, extra difficulty, extra credit.

AI Integration — Compulsory

A single **scannable QR code must be embedded on your X-banner**. It is the judges' gateway: scanning it takes them to BOTH your AI chatbot and your AI-generated concept video. All three items below are required of every group.

Required of every group

- 1) AI Legal Advisor Bot (via the QR).** A working AI chatbot (Custom GPT, Gemini Gem, Poe bot, or similar) that answers legal questions about YOUR business scenario. Judges will scan and test it live.
- 2) AI-Generated Concept Video (via the QR).** A short AI-generated video (about 2–3 minutes) walking through your whole concept — the business, the crisis, and how the laws resolve it. Reachable from the same embedded QR code.
- 3) The AI Fact-Check Challenge.** Find at least ONE place where an AI tool gave you wrong, outdated, or hallucinated legal information — a fake section number, a misstated rule, or an invented case. Show the AI's exact claim, then correct it with the real statute and section. This proves you can supervise AI, not just trust it.

X-Banner Design Guidelines

Your poster takes the form of a printed **X-banner (X-stand)** — portrait orientation, recommended size about 2 ft × 5 ft (60 × 160 cm). Design it to read top-to-bottom as the eye travels down the stand.

Suggested top-to-bottom layout

- Title, submitted to and submitted by related information
- Central visual / theme connecting all five laws
- Act 1 — The Rise (formation & operations)
- Act 2 — The Crisis (problem, laws applied, remedy)
- Law-integration map (how the five laws interlock)
- AI section — embedded QR (chatbot + concept video), Fact-Check box, tools used
- Conclusion / lessons learned

Design rules

- Format: printed X-banner on an X-stand, portrait orientation (60 × 160 cm).
- Place the QR code large and at a comfortable scanning height for someone standing.
- Use charts, diagrams, flowcharts, and a clear central theme.
- Highlight real Bangladeshi business examples and realistic figures.
- Keep text concise; let visuals carry the story.

Competition Format

This is a competition, not just a presentation. Each group faces two rounds before the judges. Every member must speak.

Round	Time	What happens
Round 1 — The Pitch	3 min	A sharp overview of the business and the crisis — hook the judges fast.
Round 2 — The Legal Firefight	5 min	Judges' Q&A plus a surprise “curveball” scenario your team must resolve on the spot, citing the correct law. Judges may also test your AI Legal Advisor Bot.

Awards

- **Overall Champion** — highest total score.
- **Best Legal Analysis** — sharpest reasoning and accuracy.
- **Best AI Integration** — including the best Fact-Check catch.
- **Most Creative Poster** — strongest visual storytelling.

Evaluation Criteria (15 Marks)

Criteria	Marks
Legal understanding & accuracy	3
Integration of all five laws into one coherent story	2
Crisis analysis & legal problem-solving	2
Bangladeshi context & realism	2
Creativity & visual appeal (X-banner)	2
AI integration (QR chatbot + video, Fact-Check)	2
Presentation, live defense & teamwork	2
Total	15

Bonus: up to **+1 mark** for correctly applying a Bonus Challenge Law (marks cannot exceed the maximum).

Rules & Academic Integrity

- Each group's business concept and crisis must be original and unique. No plagiarism of any kind.
- AI output is a starting point, not final legal truth: verify every legal claim against the actual statute before putting it on your poster.
- Cite the AI tools you used honestly. Passing off unverified AI text as your own legal analysis will be penalized.
- All members must participate in the presentation. Formal attire is required.

Submission & Logistics

- **Submit and present on:** October 05, 2026 *{(Smart Room Number: 628) (Time: 9 AM – 5 PM)}*
- **Bring:** the printed X-banner on its X-stand.
- Ensure neatness, clarity, originality, and a working embedded QR code linking to your chatbot and concept video.

***Build boldly. Argue sharply. Verify everything.
Best of Luck!***
